

Ethan Passino

Junior Software Engineer

Fort Wayne, IN • itzethanpassino@gmail.com • (260) 442-9007 • GitHub: <https://github.com/Ethan-Passino> • Portfolio: <https://ethanpassino.com> • LinkedIn: <https://linkedin.com/in/ethan-passino-65a08b337>

SUMMARY

- Junior Software Engineer with 15 months of experience building and shipping a full-stack enterprise web application on an established platform using React, TypeScript, Node.js, SQL, Docker, and Playwright.
- Increased unit-test coverage by 30% and Playwright coverage by 15% while contributing reusable test automation, documentation tooling, CI/CD, QA, and release support.

TECHNICAL SKILLS

- **Languages:** TypeScript • JavaScript • C# • Java • Python • SQL • HTML • CSS
- **Frameworks & Libraries:** .NET • React • Node.js • Express • MUI • Tailwind CSS • LiveCharts
- **Databases:** PostgreSQL • MongoDB • SQL Server • MySQL • SQLite
- **Tools & DevOps:** Git • Docker • GitLab CI/CD • Jira • Agile/Scrum • Linux
- **Testing & Other:** Jest • React Testing Library • Playwright • k6 • REST APIs • WebSockets

WORK EXPERIENCE

Junior Software Engineer - *Juware, Fort Wayne, IN*
July 2025 - Present

- Contribute to a full-stack enterprise web application on an established platform, delivering production features using React, TypeScript, Node.js, SQL, and Docker.
- Increased unit-test coverage by 30% by adding automated tests across core application features.
- Increased Playwright end-to-end coverage by 15% and developed reusable utilities for role-based workflow testing.
- Extracted documentation automation into a reusable npm package and added custom-document publishing, Markdown and Confluence output adapters, and automatic ERD generation.
- Automated artifact publishing through GitLab CI/CD, replacing manual deployment steps and supporting multi-environment delivery.
- Built and validated data migrations and k6 performance-test scaffolding to support safe data changes and repeatable scenario-based performance testing.

Full Stack Developer Intern - *Juware, Fort Wayne, IN*
May 2025 - July 2025

- Built full-stack features in React, TypeScript, and Node.js within an Agile environment.
- Co-designed the architecture and implementation plan for an internal web configuration tool.

- Promoted to Junior Software Engineer in July 2025.

Shift Leader — *Pizza Hut, Fort Wayne, IN*
May 2022 – July 2025

- Led 6–15 employees per shift, improving service flow and reducing labor costs by 5–10% through schedule adjustments.
- Maintained customer satisfaction while supporting hiring and training efforts.

PROJECT EXPERIENCE

Rewinder Scheduling System – Optimization Tool (Capstone Project)
2024 – 2025

- Contributed to the design and implementation of a C++ desktop application that automates batch trimming schedules for a manufacturing process.
- Developed custom scheduling algorithms to handle variable roll sizes and eliminate manual planning.
- Built an interactive GUI using wxWidgets with drag-and-drop roll arrangement and real-time error feedback.
- Saved 4–6 hours per week by automating schedule creation.

Personal Finance App
2024 – Present

- Developed a desktop budgeting app in C#/.NET with WPF and SQLite for tracking budgets and expenses.
- Included full CRUD support and interactive graphs using LiveCharts to aid financial decisions.
- Used by 10+ individuals to manage personal budgets; reduced monthly overspending in 3 users by 20% on average.

TaskFlow — Full Stack Task Management App
2024 – 2025

- Created a Kanban-style task board using React, Node.js, and MongoDB with real-time collaborative editing.
- Co-led frontend/backend design; improved task tracking efficiency by 40% in user testing.

EDUCATION

Purdue University Fort Wayne - Fort Wayne, IN
Bachelor of Science in Computer Science
Graduated May 2025 | GPA: 3.45
